

Subject Index to Volume 1—1979

Erratum

The January/February issue of *Clinical Preventive Dentistry* should have been designated Volume 1, Number 1, not Volume 6, Number 1.

- Anxiety, *see* Mood changes
- Book reviews, 5:40
- Caries prevention
 see also Cariogenesis; Fluorides
 dental flossing in, 3:23
 dietary counseling, 2:14
 in handicapped patients, 4:16
 iron compounds in, 3:6
 sucrose
 dietary (Letter to the Editor), 1:6
 taste threshold, 2:14
- Caries prevention
 topical fluorides, self-administered, 1:21
- Cariogenesis
 see also Caries prevention
 iron compounds in, 3:6
 relation of age to plaque, 6:23
 relation of plaque, 2:26
- Diet
 counseling for caries prevention, 2:14
 in handicapped patients, 4:16
 nutritional intake of dental school populations, 4:12
 nutritional survey of periodontal patients, 5:35
- Dental flossing, proximal caries prevention, 3:23
- Editorial, 5:6
- Education, *see* Teaching methods
- Endocarditis, infective
 dental precautions in presence of, 6:14
 dental procedures as precursor, 6:14
- Extraction, serial, in malocclusion, 4:21
- Fluorides
 for handicapped patients, 4:16
 gels, self-administered, 1:21
 in water supply
 concentration on root surface, 5:7
 effect on root surface concentration, 5:7
 mouth rinses, self-administered, 1:21
 topical application
 penetrativity, *in vitro* study, 6:11
 self-administered, 1:21
 wetting, *in vitro* study, 6:11
- Gingival tissue healing
 electron microscope studies, 4:24
 urea peroxide effect on, 1:19
- Gingivitis
 home care procedures, 6:7
 oral physiotherapy for, 6:7
 relationship to periodontal disease, 3:18
 sodium bicarbonate dentifrice trial, 5:12,17
- Handicapped patients, dental hygiene adaptations for, 4:16
- Iron compounds, in caries prevention, 3:6
- Letter to the Editor, 1:6
- Malocclusion, serial extraction in correction, 4:21
- Mood changes, related to dental procedures, 6:20
- Mouth rinses
 in caries prevention, 1:21
 in plaque prevention, 2:6
- News Notes, 6:29
- Nutritional intake, *see* Diet
- Periodontal disease
 gingivitis in, 3:18
 nutritional intake of periodontal patients, 5:35
 plaque in, 3:18
- Pharmacist, as source of dental health information, 3:27
- Pit and fissure sealants, in handicapped patients, 4:16
- Plaque prevention
 age relationship to accumulation, 6:23
 antibacterial mouth rinse, 2:6
 brushing methods, preschool children, 2:23
 cariogenesis, 2:26
 in handicapped patients, 4:16
 mouth rinse, effect on, 2:6
 sodium bicarbonate dentifrice trial, 5:12,17
- Preventive dentistry teaching methods, *see* Teaching methods, patient instruction
- Product news, 5:42; 6:28
- Prophylactic pastes and abrasives, *in vitro* study, 1:13
- Restorative materials
 pulpal reaction to, 4:6
 surface effect on gingival health, 5:19
- Sucrose
 consumption, effect on cariogenesis (Letter to the Editor), 1:6
 taste threshold, 2:14
- Sugar, *see* Sucrose
- Sodium bicarbonate dentifrice, experimental study
 adults, 5:12
 teenagers, 5:17
- Teaching methods
 dental school curriculum, 1:29
 faculty attitudes, 3:10
 preventive dentistry topics, 3:10
 TEAM training, value of, 5:27
 patient instruction, 2:10
 age, effect of, 6:23
 community health, 3:10
 dental school preparation, 3:10
 dietary counseling by age, 6:23
 handicapped patients, 4:16
 oral hygiene performance, 1:7
 patient response to, 1:7
 periodontal disease, 3:18
 preschool children, 2:23
 preventive dentistry curriculum for pharmacists, 3:27
